

Perstorp and REACH

REACH Product Information Sheet

Concerning Perstorp products relevant to REACH registration.

Pre-registration information

The Pre-registration phase was closed December 1 2008. Below please find a list of the products (REACH relevant substances) pre-registered by the Perstorp Group.

Registration information

All relevant substances (manufactured or imported by Perstorp) in Perstorp products will be registered within REACH deadlines. Registration numbers will replace the pre-registration numbers when received.

Exposure Scenarios (ES) will be created when requested, to cover the uses decided in the Chemical Safety Report in cooperation with our customers. (ES strategy see Information letter no 9.)

SDS (Safety Data Sheets)

Due to new legislation, REACH (EU) and GHS (UN) & CLP (EU), all affected SDS will be revised. This extensive SDS revision will be done during 2011.

So called extended SDS according to REACH (only applicable on classified products) will be available as soon as it is possible with regard to the new and more extensive requirements.

The updated SDS will automatically be sent by e-mail to our customers (SDS contact given to our Customer Service Organisation. E-mail to: CSO_MSDS@perstorp.com).
